

**Corent Technology and Dell Services Offer a Complete Suite of  
Cloud Application Migration Services**

***Corent's SurPaaS™ - The Scalable SaaS Delivery Platform - Now Powered by Dell***

ALISO VIEJO, Calif., Sept. 26, 2013 -- [Corent Technology](#) today announced that it is working with Dell Services to provide independent software vendors (ISVs) and enterprises with a flexible solution to migrate their existing on-premise applications to Software as a Service (SaaS), leveraging Corent's groundbreaking SurPaaS™ platform.

Corent and Dell's joint offering gives customers scalability, speed to market and cost savings by converting applications from single to multi-tenant to be hosted on private clouds, including Dell Cloud Dedicated, or public clouds such as those in the [Dell Cloud Partner Program](#) and others.

"Working with Dell Services, we are expanding our power and reach to serve the multitude of enterprises and software vendors looking to adopt SaaS within their applications or offerings portfolio," said Shafi Syed, executive vice president of engineering, Corent Technology. "The solution will allow businesses globally to move to the future by bringing their applications portfolio into the Cloud."

"The Applications and Business Process Outsourcing line of business within Dell Services is committed to helping our customers seamlessly migrate applications into the cloud. Working with Corent to migrate applications to the cloud with their SurPaaS platform enables easier cloud adoption and accelerated business value. Our joint offering makes it possible for customers across the spectrum to get a significant time to market advantage as they adopt cloud," said Chethan Gorur, director, cloud, Applications & BPO, Dell Services.

[Corent's SurPaaS—Private SaaS Edition](#) delivers benefits including greater agility in responding to quickly evolving business requirements and reduced traditional fixed IT operating costs. SurPaaS recently was awarded an extensive patent with twenty claims for transforming software to efficient multi-tenant SaaS without the high cost and time required to alter the code of the software application. It has been in production at well recognized companies including Boeing, the National Academy of Television Arts & Sciences (Emmy Awards®), EMAS Pro and uPhotoMeasure, among others.

**About Corent Technology, Inc.**

Corent Technology is a leading provider of SaaS-Enablement software. Corent's software platform was named the "2012 Cloud Product of the Year" and has received multiple industry awards and recognitions in the past.
