Corent's SaaSOps™ powers Everything Blockchain's next-gen "Database as a Service" on AWS and in AWS Marketplace

August 28, 2023 06:00 AM Eastern Daylight Time

Aliso Viejo, CA, and Jacksonville, FL – Corent Technology Inc. and EverythingBlockchain Inc. announced the release of BuildDB blockchain-enabled fiscally sustainable NoSQL database as a fully managed Software-as-a-Service (SaaS) offering running on Amazon Web Services (AWS) and available in AWS Marketplace, powered by SaaSOps™.

Corent's SaaSOps™ provides the SaaS operations and management capabilities needed by modern SaaS providers to implement and manage sophisticated applications including Kubernetes applications on the cloud, saving years of development and an average of 90% savings on SaaS OpEx - the cost of operating a SaaS solution through its artificial intelligence (AI)-driven automation.

Scott Chate, Vice President of Partner and Market Development at Corent Technology commented that, "This example of rapid SaaSification and publishing of a modern application as SaaS in AWS Marketplace is exactly the type of scenario that SaaSOps™ with its Marketizer™ capabilities is designed to do. Enabling an ISV to become a SaaS provider with all the capabilities needed to operate and manage SaaS offerings, without requiring the ISV to invest the time and effort into developing the 'as a Service' capabilities for their Software, is the breakthrough proposition of SaaSOps™."

Working to a tight timeline for a major airline customer, Corent enabled a complete SaaS implementation of BuildDB via AWS Marketplace with flexible usage-based metering and billing.

Cedric Harris, Chief Solutions Architect of Everything Blockchain said, "We needed a fast and capable solution to make our product available in AWS Marketplace in a tight timeframe. We were pleasantly surprised to find out that it did much more than that, enabling us to implement geo-local customer deployment options and usage-based metered billing with virtually no changes to our application. Corent's support throughout the project was first-rate."

AWS Marketplace is a digital catalog with thousands of software listings from independent software vendors that make it easy to find, test, buy, and deploy software that runs on AWS.

About Corent Technology

Corent Technology, Inc. is a leading innovator in the cloud migration and SaaS-enablement technology space. Corent's SurPaaS® Platform is used by key enterprises, system Integrators and cloud providers to enable rapid discovery, analysis, planning, optimization, and migration to the cloud; and optionally, automated transformation of software applications to efficient, scalable SaaS. Corent is managed by a team of industry veterans from Microsoft, IBM, HP, EMC, Oracle, and VMware among others.
